

Value-Based Care

Healthcare Risk Management & Advisory

FTI Consulting is uniquely positioned to assist payers and providers with the development, implementation and optimization of value-based care (VBC) plans and programs. Today’s healthcare environment, public and private purchasers demand greater value – care that is demonstrably impacting the health status and outcomes of a community while making the most out of available funds and resources. As a result, purchasers are pursuing VBC programs and arrangements.

Our Capabilities

FTI Consulting’s VBC Solutions are designed to help purchasers and providers design, implement and optimize VBC plans and programs by offering products and services that target the VBC pillars: **Clinical & Service Integration, Operations** and **Financial Performance & Risk Management**.

Clinical & Service Integration

Organizations that align provider incentives and workflows with VBC arrangement guidelines can improve engagement across providers and with patients, drive better outcomes for patients, and increase shared savings. Your organization already invests in the best population health platform to help providers and supporting staff capture the intervention opportunities. Our expert team can help your organization hone your approach to provider network management, population health management and provider engagement through process analysis and improvement, optimal use of information systems in support of service delivery workflows and delivering tailored training to providers and their staff.

Operations

It is critical that organizations in VBC arrangements have the governance, analytical and operational processes in place to ensure fair reimbursement for the care provided to patients and the risk associated with managing patient care needs over time. We assist clients to ensure the establishment of leading-class analytics and operational processes to optimize performance while remaining balanced by strong process-controls to mitigate risk.

Financial Performance & Risk Management

We work with organizations engaged in VBC arrangements to develop and implement strategies that leverage best practices to optimize financial performance and enable effective risk management strategies and compliance.
