

FTI Consulting – Your Partner for Audit-Ready Greenhouse Gas Accounting

Organizations increasingly face demands from regulators and other stakeholders to report Scope 1-3 greenhouse gas emissions and other ESG metrics. They often struggle to align with global standards and implement transparent, auditable, and replicable systems that maximize efficiency and minimize risk. Without the right expertise, organizations risk inaccuracies, non-compliance, and missed opportunities to drive improvement.

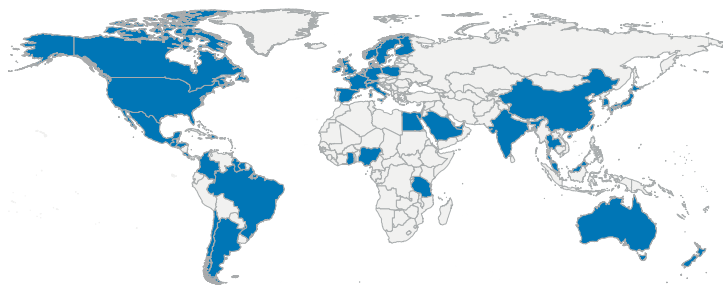

As a trusted leader in ESG advisory services, FTI Consulting's experts have delivered greenhouse gas inventories for clients operating across 50+ countries. Our team helps clients develop effective strategies to manage complex supply-chain data, bridge data gaps, and deliver audit-ready emissions reporting that drives business value.

FTI Consulting experts are leaders in tackling the most difficult challenges in carbon accounting

FTI Consulting delivers precise, comprehensive, and audit-ready Scope 1-3 emissions inventories. We help build greenhouse gas inventories using the best available data, working alongside your team to address data limitations, implement improvement processes, and develop reporting systems that meet the highest standards of transparency and accuracy.

Our team has performed Scope 1-3 emissions inventories for large companies and tackled the most complex challenges in carbon accounting across every stage of the value chain. By combining the most up-to-date public data with industry-leading third-party software, we deliver reporting that drives business value. Our comprehensive approach ensures that clients not only meet compliance requirements but also identify opportunities for operational efficiency and strategic advantage.

Tailored approaches for every stage of ESG reporting readiness

— WE HELP OUR CLIENTS

Whether it's enhancing existing reporting or creating new functions, our experts are here to help.

- Prepare for compliance reporting and align with third-party standards like CDP and GRI
- Build and manage data collection systems and engage with supply chain partners to ensure data quality
- Organize and fill data gaps to prepare transparent and audit-ready reporting
- Collect and apply the latest publicly available data and emissions factors
- Ensure calculations meet global standards guided by the GHG Protocol
