

Resolving Cannabis Industry Disputes

While we hope to avoid them, disputes are a part of today's business climate. No matter how well you conduct your business, disputes between shareholders, employees, suppliers, customers, and business partners may arise. In the cannabis industry, litigation can also arise from a deeply complex regulatory framework including regulators bringing civil actions as a means of enforcement.

FTI Consulting's professionals analyze financial, competitive and industry information to help clients unravel challenging financial and economic issues in commercial disputes and litigation. These professionals are highly skilled at communicating their findings through expert testimony, using sophisticated graphics and courtroom technology.
