### Why FTI Consulting?

#### Senior Leaders
Our senior staff members lead from the front and actively participate throughout engagements. We maintain a program of continuous quality assurance and internal challenge.

#### Industry, Regulatory and Consulting Experience
Our teams are composed of professionals with senior executive industry, regulatory and consulting experience which enables us to provide practical regulatory insights and support.

#### Quality and Integrity
Our heritage of litigation and regulatory assignments underpins a consistent commitment to quality and integrity. Our experience in investigating failures and errors means we know how to ensure they are avoided in the future.

#### Credibility and Independence
We are recognized for our credibility with regulators and our independence. We do not provide audit attestation services.

### Innovative Solutions
We bring FTI Consulting's experiences from a wide range of industries which face similar challenges, to deliver innovative, pragmatic, and effective solutions for our clients.

### Local Language Capabilities
We have extensive experience working on complex issues and multi-faceted assignments, in which we bring a wide range of experience, skills and practical knowledge. We provide staff with local language capabilities when needed and work across segments in a collaborative and efficient manner.

### Advanced Technology Solutions
We offer advanced technology solutions to enable our clients to better manage their governance, risk and regulatory challenges. We have access to a range of economists, statisticians and analysts to support our work.
Our Definitive Expertise

Our professionals are acknowledged leaders in their chosen field, not only for the level of clarity and understanding that they bring but for their ability to identify practical, workable answers to complex questions. Viewed in aggregate, FTI Consulting is unmatched in the depth and breadth of expertise we bring to bear on our clients’ behalf.
Navigating the LIBOR Transition

THE SITUATION

The London Interbank Offered Rate (LIBOR) is embedded in an estimated $400 trillion of financial contracts, and panel banks will no longer be compelled by the UK Financial Conduct Authority (FCA) to submit rates to publish LIBOR beyond 2021.

The US Securities and Exchange Commission (SEC) and the FCA have advised public companies (and regulated entities) affected by LIBOR to assess their risk exposure, quantify the financial impact, develop remediation plans, and communicate material information to stakeholders.

THE CONSEQUENCE

The LIBOR transition will impact counterparties to each LIBOR-based contract, creating winners and losers, and heighten uncertainty over the interim period.

Substitute rates will, at a minimum:

— Complicate the amending of contracts for financial products, especially those not governed by standard documentation or for those requiring a complex re-approval processes (e.g. floating rates bonds and notes, syndicated loans, and securitizations)
— Necessitate the creation and adoption of a broad range of new hedging instruments
— Increase capital erosion risk through differences in bank and corporate funding costs
— Create gap-risk in hedging accounting, increasing need for basis swaps

THE RESPONSE

Firms must proactively identify exposures to LIBOR, as well as evaluate and quantify the impact of cessation. Risk assessments should be comprehensive, with segment-level focus on firm products, clients, processes, and information technology. Risks within critical financial, operational, and risk management systems should be evaluated with LIBOR-dependencies identified within a detailed remediation plan.

Firms should also consider disclosing progress on evaluation and mitigation of related risks. If material exposures have been identified but the impact not yet fully assessed and quantified, they should consider disclosing these facts.

2. See SEC Staff Statement on LIBOR Transition, jointly by the Division of Corporation Finance, Division of Investment Management, Division of Trading and Markets, and Office of the Chief Accountant, July 12, 2019.
We combine deep industry knowledge and academic rigor: our people are true experts. They have contributed to the theory, written seminal books on derivatives, traded global markets across asset classes, built and managed leading trading businesses in major financial institutions, and advised on high-profile transactions and litigation in global capital markets and commodity trading. Our unique combination of quantitative and trading expertise across asset classes, and proprietary analytics and risk management technologies gives us an unparalleled ability to support our clients through the LIBOR transition.
**How FTI Consulting Can Help**

**Public Companies** have a duty to inform investors of any material impact of LIBOR cessation on the company and should place importance on keeping investors informed of the company’s progress in evaluating and identifying relevant risks. Investors must also be informed if a material impact has been identified but not fully evaluated.

**Banks** are likely to be adversely affected by the LIBOR transition, since deposit liabilities may shift away from LIBOR faster than loan assets. This mismatch could affect net interest income measures and firm profitability. Routine stress testing of the banking industry is also likely to be impacted by the transition.

**HOW FTI CONSULTING CAN HELP**

— Provide guidance regarding evaluation and mitigation of risks to companies that may arise from failures to disclose material information about impacts resulting from the LIBOR transition

— Quantify the potential economic impact to companies using FTI Consulting’s proprietary Analytics and Risk Management Quantum (“Quantum”)

— Assist in evaluating the materiality of information to investors

— Evaluate bank portfolios to quantify any material impact on firm income resulting from the uneven transition of firm assets and liabilities away from LIBOR

— Conduct independent stress tests under new rate regimes
# How FTI Consulting Can Help

## Broker-dealers and Central Counterparties

Financial Advisors should be prudent when recommending investments and financial products affected by the LIBOR. Advisors should consider disclosing relevant risks to clients and the existence of alternative investment products.

**HOW FTI CONSULTING CAN HELP**

- Provide guidance on which instruments are available and prudent for certain investor classes
- Perform client portfolio analyses using our proprietary Quantum system to evaluate risk exposure

## Asset Managers and Funds

Asset Managers and Funds should evaluate the impact of the LIBOR transition on the value and liquidity of investments. Specific risks may justify disclosure within prospectuses.

**HOW FTI CONSULTING CAN HELP**

- Quantify the range of possible effects of transition scenarios on specific financial instruments using our proprietary Quantum system
- Evaluate investment portfolios using Quantum, quantify fund-specific risks, and compile tailored descriptions for stakeholders

## Financial Advisors

Financial Advisors should be prudent when recommending investments and financial products affected by the LIBOR. Advisors should consider disclosing relevant risks to clients and the existence of alternative investment products.

**HOW FTI CONSULTING CAN HELP**

- Provide guidance on which instruments are available and prudent for certain investor classes
- Perform client portfolio analyses using our proprietary Quantum system to evaluate risk exposure

## Private Equity Firms

Private Equity Firms need to proactively evaluate contracts that depend on LIBOR, conduct impact analyses, and disclose relevant information to stakeholders. In the event of renegotiation, differences in contract values would need to be resolved.

**HOW FTI CONSULTING CAN HELP**

- Provide expertise and our proprietary technology, Quantum, to conduct independent contract valuations and quantify differences in value
- Quantify the effects of the LIBOR transition on financials and conduct impact analyses
- Assist in the compilation of tailored risk disclosures based on portfolio analysis using Quantum
Our Quantum Solution

Quantum, FTI Consulting’s proprietary analytics and risk management system, is our latest flagship technology solution that enables assessment, estimation, and quantification of the impact of the LIBOR transition through advanced independent valuation and risk analysis capabilities. The system follows best practice in analytics and risk management practices used by the most sophisticated broker-dealers and hedge fund institutions.

Quantum is offered as a service, combined with world-class quantitative and trading expertise. The solution was developed by industry-leading experts with experience building cross asset trading infrastructures at global investment banks and hedge funds. The technology takes a real-time, dynamic modeling approach to quantify the impact of the LIBOR transition in the context of changing targets and market/regulatory uncertainty across products. The system delivers valuations, advanced risk reporting, and sophisticated stress testing tools to identify exposure to LIBOR and transition impact.

BEST PRACTICE

— Advanced financial modeling and proprietary analytics for a broad range of cash and derivative products including complex derivatives and multi-asset products
— Algorithms for calibrating numerical models to market data in accordance with the latest industry standards
— Comprehensive risk analysis including a complete risk reporting capability at product, asset-class and portfolio levels
— Customizable scenario analysis, including nonlinear stress testing

CHARACTERISTICS

<table>

Our Contract Intelligence

FTI Consulting offers a purpose-built, structured analytics engine that identifies and analyzes a company’s relevant contract universe. Working alongside legal counsel, our AI-driven solutions assess the current state of fallback provisions and prioritize contracts that require remediation or renegotiation.

BENEFITS

— Cost-effective solution for a key component of contract lifecycle management, offering organizations a centralized, organized method to find, review, and analyze their global contract universe

— Hyperscale data processing technology stack to detect foreign languages and machine-language-translation capabilities to convert captured data to English or required languages

— Industry-leading contract scope assessment & collection leveraging information governance and forensic collection practices to discover and collect documents with a minimum amount of business disruption

— Industry-leading suite of OCR technologies and methodologies to transform contract documents so they can be searched, classified, and analyzed with ability to further enrich the transformed contracts to identify key terms, such as entities involved, jurisdictions, key dates, and contract types

— Customizable project reporting and analytics dashboard for visual representations of contract content and data trends

— Foreign language review in Albanian, Arabic, Azerbaijani, Chinese (Mandarin and Cantonese), Croatian, Czechoslovakian, French, Dutch, Georgian, German, Greek, Hindi, Hungarian, Indonesian, Italian, Japanese, Korean, Malaysian, Polish, Portuguese, Romanian, Russian, Serbian, Spanish, Swedish, Tagalog, Thai, Turkish, Ukraine, and Vietnamese

— Integrated technology stack utilizing AI to drive clause extraction and proven review tools for deeper contract analysis and data transformation, supported by robust workflow and quality control methodologies

TECHNOLOGY STACK & DATA PROCESS

As required, contracts are collected from physical sites and electronic repositories using forensic methods to create a centralized corpus of debt and derivative documentation.

Collected contracts are ingested and processed in an AI platform to automatically identify relevant documents and extract implicated elements and clauses.

In-scope contracts and extractions are analyzed to codify and structure data in an integrated review platform including legal expert workflows for quality assurance.

Data output is utilized for analytics dashboard, import to client systems, and template generation platforms for contract amendment and repapering.
Our Contract Analysis Platform

1. Automated clause identification and extraction powered by Kira AI software, trained to identify content relevant to rate transition

2. Relevant clause extractions transformed in Ringtail system to structured data for analytics or import to document generation/repapering system

3. Contract family organization (i.e. primary contracts grouped with related ancillary documents) with data summaries reflecting the entire contract relationship

4. Integrated document navigation across systems including direct-to-clause locations in the contract document
Our Strategic Communications

In recent years, the U.S. financial services system has faced significant challenges that have shaken the public’s confidence to the core. While the financial crisis is mostly behind us, the system today continues to operate in choppy waters – enduring global and domestic political uncertainty, looming recession risks, and an overloaded corporate debt market.

The LIBOR transition begins within the financial ecosystem that will ultimately touch the lives of millions of end consumers. Such shifts must be communicated – on an enterprise level - deliberately and carefully, with an eye towards fortifying confidence in each company’s ability to manage change.

Firms must be proactive and forward-leaning in LIBOR transition communications. Particularly as the change is not regulatory, the onus falls to each firm to explain 1) What is happening 2) How it is affecting products and customers and 3) How the firm is managing the situation to protect investors and customers.

FTI Consulting is well-suited to drive internal and external communications related to this transformational shift in benchmark rates.

CHARACTERISTICS OF A SUCCESSFUL COMMUNICATIONS STRATEGY

— **Clear** – In the absence of a like-for-like LIBOR replacement, communications as to what the new benchmark will be, the reasons driving the change, and the impact to customers and investors must be clearly conveyed.

— **Paced** – Each element of this complex process must be carefully planned and executed. The changes are complex and must be communicated in stages, paced over 18-24 months.

— **Enterprise-Wide** – Starting at the board level and executives, and including frontline sales teams and call centers, staff members must be made aware of the transition and give consistent responses and address stakeholder concerns.

**OUR EXPERTISE**

*We understand your business.* Our client teams are staffed with industry experts with first-hand knowledge of the opportunities and challenges you face.

*We simplify the complex.* We have helped leading financial services brands craft compelling and differentiated narratives in strategically important markets, in one of the most competitive, complex industries in the world.

*We thrive in disputes.* We have provided communications counsel through high-profile regulatory hearings, legal disputes, and arbitration, including work on the Panama papers and LIBOR manipulation.

*We manage crises.* Our team has led communications for critical industry issues, guiding company leadership and boards through seismic events with significant commercial, public, and political implications, such as the Global Financial Crisis, the Greek bailout plan, and alleged Middle Eastern sanction breaches.

*We are global.* Our expansive footprint allows us to operate in over 180 countries; we are uniquely positioned to support financial services firms in multiple jurisdictions and to ensure a coordinated and consistent strategy.
